

Environmental Scientist

Job Description:

Pioneer is currently looking for an experienced and energetic Environmental Scientist to manage remediation projects in Western Canadian operations. This person would be responsible for the management of projects in Alberta, British Columbia and Saskatchewan. The successful candidate should be someone with project management, client communication and operational experience in the environmental field. It would be beneficial if the candidate has experience within the Alberta, B.C., Saskatchewan and Canadian Regulatory Regimes.

Responsibilities & Duties:

- Conduct Pre-Disturbance Site Assessments on wellsites and pipelines
- Conduct Phase I, II and III Environmental Site Assessments
- Conduct Detailed Site Assessments (DSAs)
- Supervise equipment during reclamation activities
- Develop and build cost proposals for the above mentioned activities

Qualifications:

- Minimum five (5) years of experience in environmental consulting industry.
- Strong communication and interpersonal skills.
- Previous management experience.
- Environmental experience in Western Canada within the Oil and Gas, Energy, Infrastructure, Real Estate and other industries.
- Experience on large scale remediation and risk management projects.
- Experience with Alberta Upstream Oil and Gas Tier I & II Guidelines (2007)

Location:

Currently our offices are located in Calgary, Edmonton, Grande Prairie, Lloydminster, Medicine Hat, Fort St. John and Regina. The ideal candidate would be based out of the Edmonton office.

Interested candidates are invited to forward a resume, in confidence to:

tkanuka@pioneer-group.ca

We would like to thank all applicants for their interest in this position however only those selected for interviews will be contacted.
